

SMART MIND EDUTECH

MAKE THE RIGHT MOVE

**Children's future...
can not go wrong,**

Everyone wants to be

a **genius!**

??? What should I do ???

Nikita asks her Grandfather.....

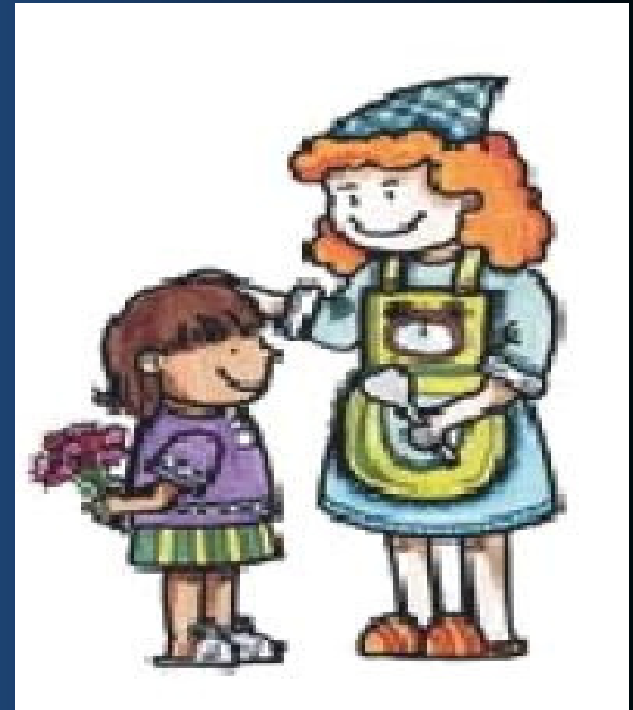

I want to be a
genius! What
should I do?

Grandfather doesn't have any
answer

Nikita asks her mother.....

I want to be a
genius! What
should I do?

Mother does not know.

Many people do not
know

how to be a genius...

? You don't understand me

? Who knows what is
inside us

Every child
has an abundant inner
world.

Most parents
don't know their children's
inner world... and this.....

Causes children
emotional disorders.

Parents are angry & kids
are unhappy.

The intelligence of the same age children should be negligibly different

Why?

Same classroom

Same teacher

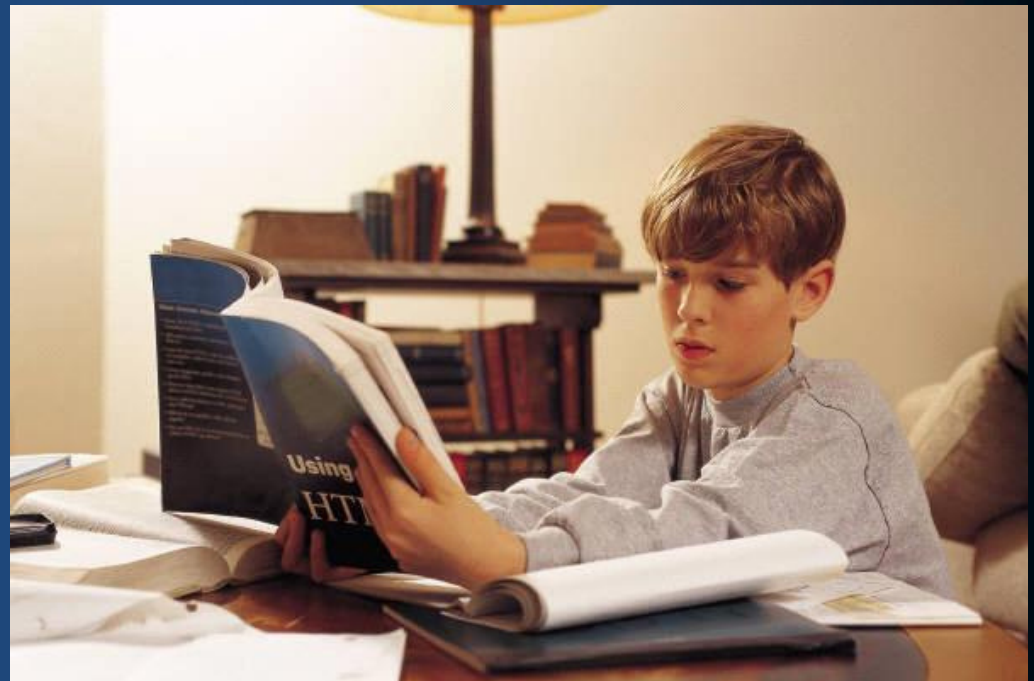

Same study time

Why then...

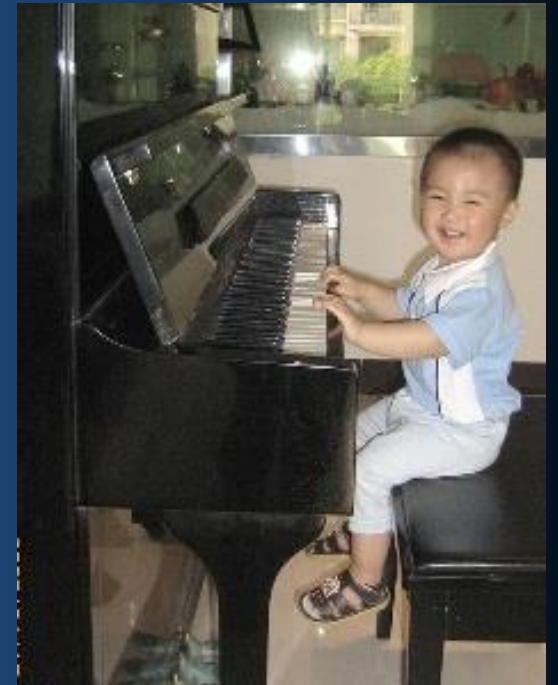

Some are top students

Some are average students

Some are inferior students

Every child
has his advantage learning
way.

Learning will not be painful.

Congenital intelligence is the base to make a genius.

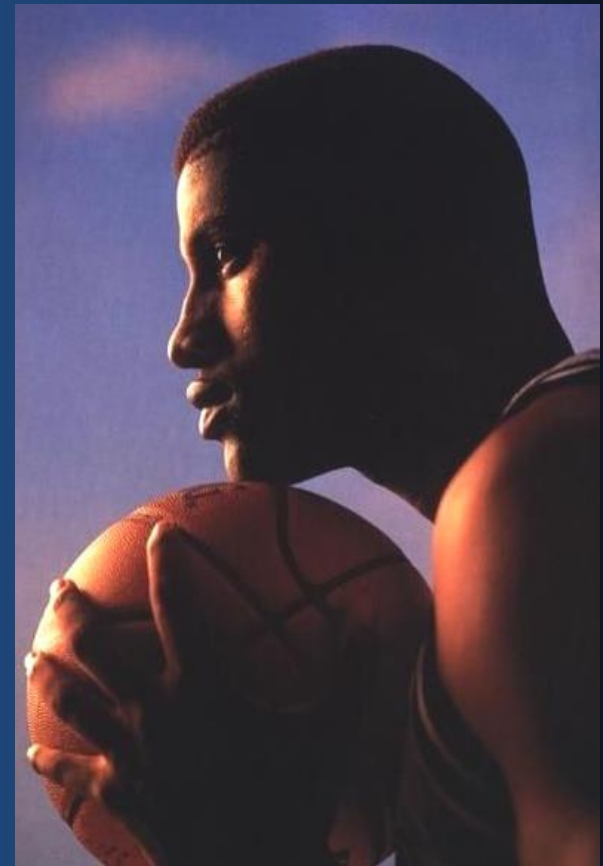

Would Edison, Lata
Mangeshkar, Sachin
Tendulkar ever reach the
top only by Hardwork,
study & Practice,

if there was no inborn talent/
intelligence in some specific areas

If Latadidi was asked to learn to dance

If Edison was asked to play basketball

If Sachin was asked to play the piano

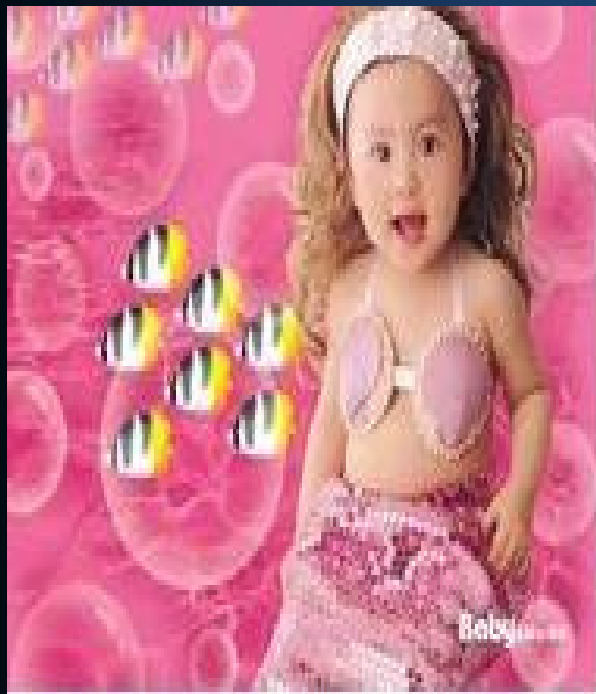

Could they have become
a **celebrity**?

Every child has enormous inner power....

It is a necessary prerequisite to make him a genius

If you can find the talent of your child – make efforts & follow the path to develop it.

Key period
is the chance to make your
child a genius.

If key period is
missed,

the talent of the child will
become weak & be gone...

Finding the children's talent

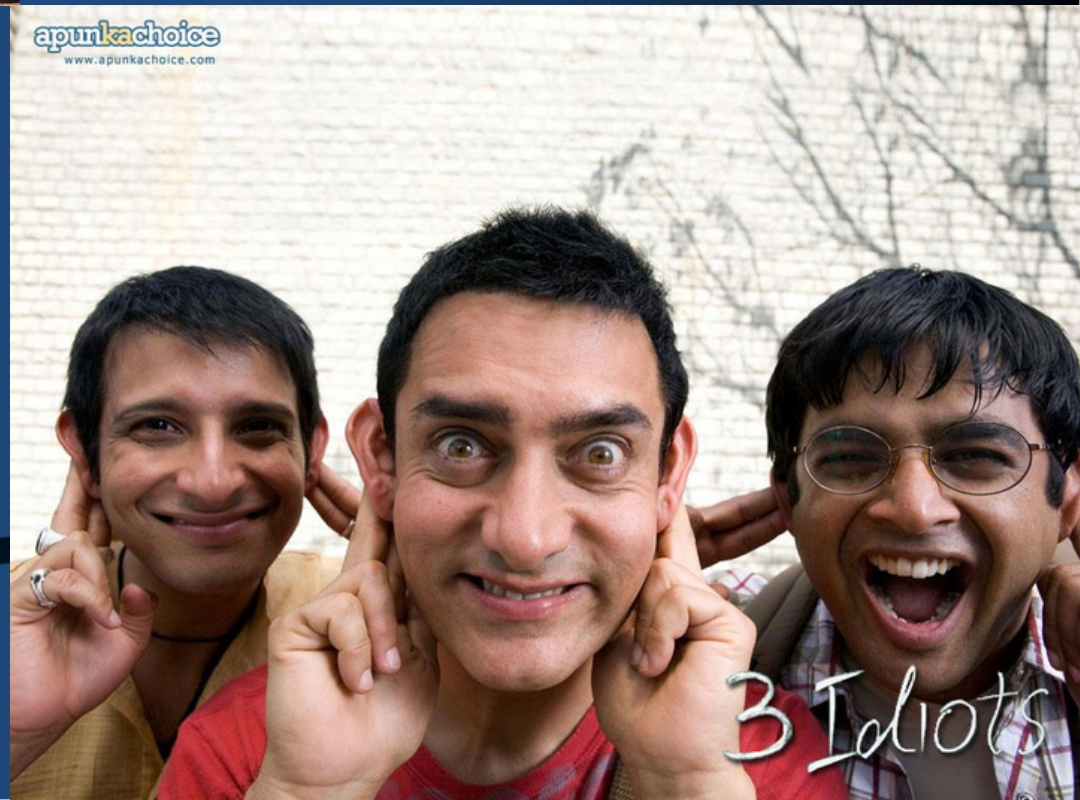

= half **success**

3 Idiots

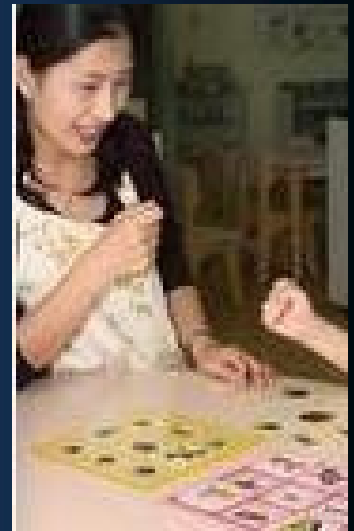

3 Idiots

3 Idiots

Worldwide people are using
Advanced **technology** to
strengthen the greatest
benefit for their children.
advantage

Take action

Identify **inborn intelligence**
& develop **talent/potential**
of yourself and your child.

Using scientific methods **to** **find your child's talent**

Potential Talent Evaluation
thru' Finger prints analysis
